- **ACCURATE SPOT PRICES**
Avoid costly mistakes when purchasing gold with the most current automatic market spot pricing.
- **DATA MANAGEMENT**
Collect and manage sales data effortlessly. Print barcode bag labels.
- **REPORTING**
Analyze sales history and profit by store and sales person. Electronically provide data to local authorities to prevent fraud.

WE MAKE GOLD BUYING EASIER

The Gold Tracker computer software was built exclusively for precious metal buyers. It is a fully integrated, user-friendly, point of sale solution running on Microsoft Windows with internet & web hosting capabilities. The Gold Tracker assists in sales, customer and inventory management. It provides a completely paperless single point of data entry for your precious metal purchases while eliminating costly mistakes. It automatically obtains fresh spot prices throughout the day. The software allows your control of settlement formulas and optional customer bonus calculations.

The Gold Tracker provides direct interfaces with scales, cameras, scanners and barcode readers to capture merchandise attributes. Interfaces with and uploads to Leads Online & BWI to eliminate double entry and save time. Enforce policy standards across multiple location buying operations. Increase your profit, professionalism, consistency and standardization in your gold buying operation. Call, email or visit our website to receive more information.
